

Implementation Strategy Checklist

Requirements	Completed
<p>The Implementation Strategy will address the hospital's significant health needs identified in the CHNA through a written plan that:</p> <ul style="list-style-type: none"> 1) Describes the health needs the hospital will address 2) Identifies the health needs the hospital does not intend to address <p>The Implementation Strategy is not limited to address only those health needs identified in the CHNA. It also may describe activities to address health needs the hospital identified in other ways.</p>	
<p>Describe the hospital's plans to meet a significant health need by identifying the programs and resources the hospital will commit to meeting the health need.</p>	
<p>Identify the anticipated impact of those programs and resources on the health need.</p>	
<p>Develop a plan to evaluate the impact.</p>	
<p>Implementation Strategies can be developed in collaboration with other organizations, with all participating organizations identified in the report. Describe any planned collaboration with government, nonprofit or other health care organizations, including related organizations in meeting the health need.</p>	
<p>For health needs the hospital will not address, describe why the hospital will not do so (i.e., community organizations more qualified, lack of expertise or resources, low priority).</p>
